On Demand

Invitation to Bid Software for General Contractors

PUBLIC DIRECTORY

On Demand is connected to a vast network of subs & suppliers that partly form the memberships of 12 local construction associations (LCAs) in Ontario, and directory registration is free for non-members as well, so you get access to an unparalleled company database to source from by MasterFormat.

ADDRESS BOOK

Bring us your database of subs & suppliers, and we will import it into your private Address Book organized by the trade codes you use internally in your company. You can add more subs as you go, copy subs to your Address Book from the Public Directory, and even save them in your desired categories.

MAIL CENTRE

Create and save custom email templates with your company's logo and signatures. Built-in mail merge features enable you to send personalized messages to selected recipients who receive the email from your own email address, so replies and failed deliveries come directly back to you.

PRIVATE INVITATION

Create a private project, add your own bid scope and sub closing date & time, upload entire folder trees of plans & specs, and you're ready to invite subs. Share a project link or project key with desired subs by email, or use the built-in Mail Centre to send and keep track of invitation emails.

OPEN ADVERTISEMENT

Reach the memberships of 12 Ontario LCAs, Daily Commercial News (DCN) and Construction Market Data (CMD) instantly when you notify one or more LCA electronic plan rooms (EPRs) with one click to publish your project. Let the industry know you're bidding, so interested parties can get their quotes in to you.

DOCUMENT DISTRIBUTION

No need to spend money to maintain an FTP site or file sharing services, or waste time on managing users and passwords. Upload entire folders with plans & specs without having to zip files, and your subs can use the built-in viewer and takeoff tools to interact with the files or download select files.

ADDENDUM DISTRIBUTION

Make sure all your subs and suppliers are aware of any changes to the tender documents, so they are not submitting prices to you based on incomplete or erroneous information. Easily send an addendum notice to all invitees and document takers with one click so everyone is on the same page.

INTENT TO BID

No need to stay in the dark until bid closing time to know which of your invited subs plan to bid. Subs can indicate intentions with one click, and the system keeps track of responses categorized by your trade codes. You can even update statuses manually if they tell you about their intentions offline or by email.

AUDIT TRAIL

The system logs every activity that takes place on your project, whether it's from your internal users, or from your subs & suppliers. Your Audit Trail tells you exactly who saw what when, so you can easily resolve any challenges from subs & suppliers about missed addenda or other information.

PRE- QUALIFICATION

Why spend money on administering paper prequalification forms or having a form developed, when you can use our built-in prequalification tool to collect information from subs & suppliers. Based on the CCDC 11 and fully customizable, this is an extreme time and cost saving feature.
